

01 Audio signal flow

Follow left to right. All six op-amp sections use +5V_A and GND; power pins are drawn at lower right.

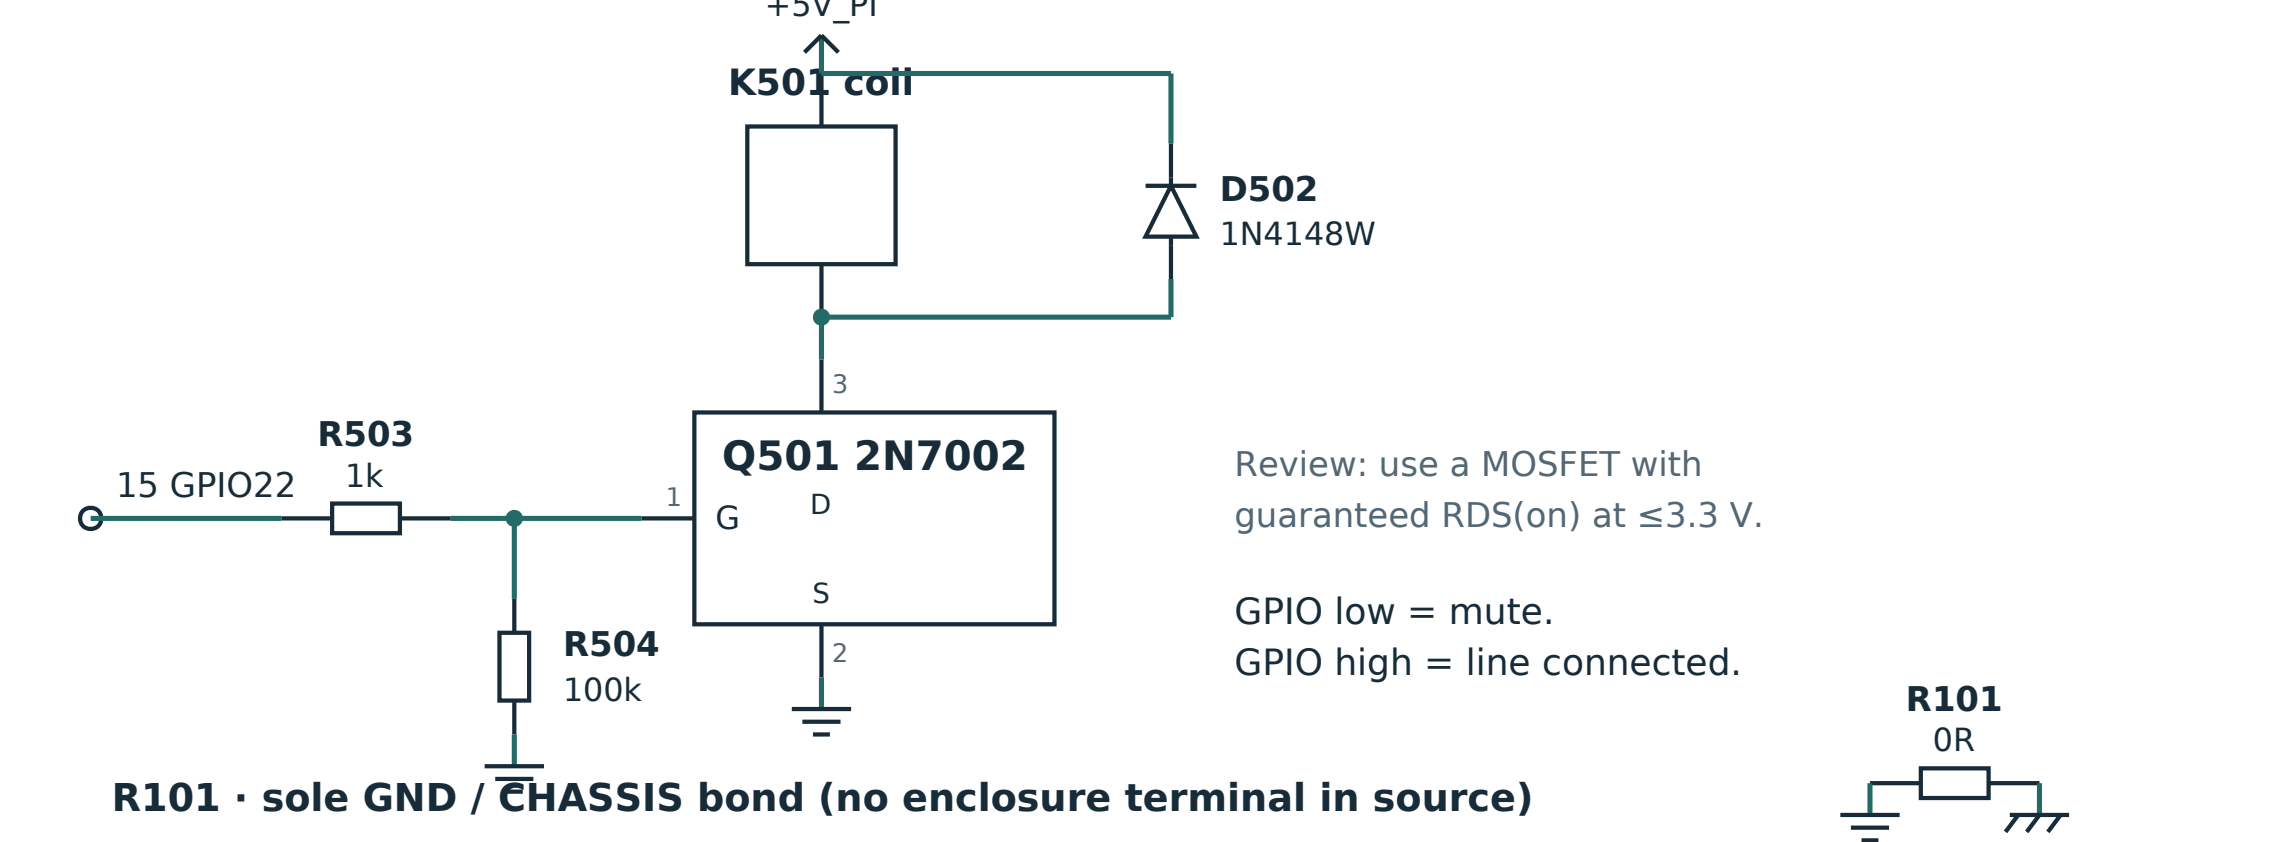

02 MIDI input

Floating current loop; optocoupler output is pulled up only to Pi 3.3 V.

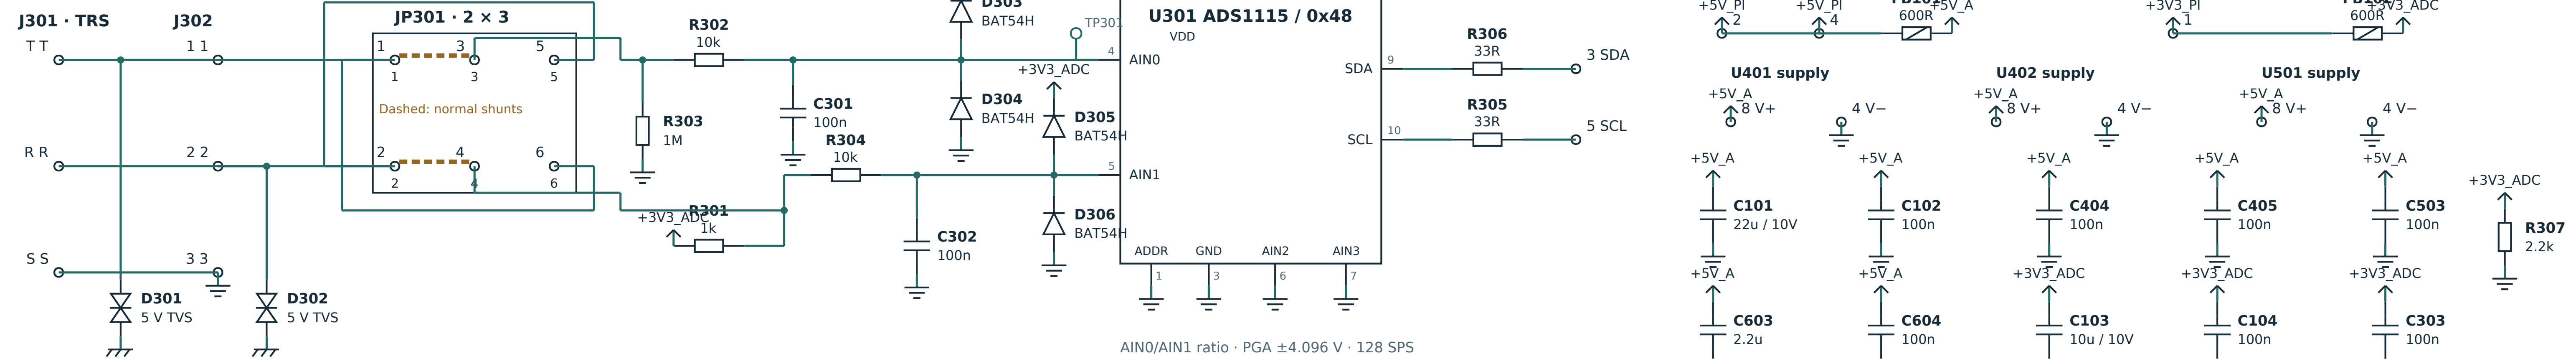

03 Line mute relay

Shown de-energized above: external tip grounded.

04 Passive expression pedal

JP301 normal: 1-3 + 2-4. Reversed: 3-5 + 4-6. Both shunts move together.

05 Power & bypass

Rail symbols connect repeated supplies. Ground ≠ chassis until R101.
